Summary

I am a dedicated Computer Engineering student expected to graduate in 2026, specializing in software development and cybersecurity. I have a strong academic foundation in data structures, algorithms, and object-oriented programming, along with practical experience in database management, secure coding, software design, development, and testing. Skilled in crafting secure web solutions and implementing cybersecurity measures, I am driven to innovate and protect digital ecosystems. I seek to apply my analytical, technical, and programming skills to excel as an entry-level software engineer.

Education

Alexandria University, Faculty of Engineering

B.S. in Computer and System Engineering

Alexandria, Egypt

Sept 2021 - Present

- Grade: **Good**
- Military : Postponed till 28

Experience

Arabian Academy Security

Cyber Security Engineer

Alexandria, Egypt

Jun 2024 – Sep 2024

- Gained hands-on experience in governance, risk, and compliance (GRC), threat management, policy development, and security audits.
- Worked with ISO 27001, GDPR, and PCI-DSS controls and SOC practices; used SIEM, log management, and threat-intelligence tools.
- Implemented secure network configurations, managed Active Directory and domain controllers, and conducted security assessments and penetration tests for a capstone project.

Chaitanya Cyber Strix Technologies

Security Operations Center Analyst

India (Remote)

Oct 2023 – Nov 2023

- Monitored and analyzed security event logs to identify potential threats and anomalies.
- Implemented incident response procedures and collaborated with the security team to remediate incidents.
- Used SIEM and threat-intelligence platforms to triage alerts and improve detection rules.

AMIT Learning

Cyber Security Intern

Remote

Jul 2023 – Oct 2023

- Built a foundation in network security, cryptography, digital forensics, and threat detection.
- Improved incident-response skills using SIEM solutions such as IBM QRadar.
- Prepared for and obtained Cisco CCNA, CCNA Security, and CyberOps Associate certifications.
- Hands-on experience with Wireshark, Metasploit, Cortex XSOAR, Kali Linux, Parrot, ASA firewall, and IDS/IPS on Windows and Linux.
- Completed online courses (Introduction to Cybersecurity, Cybersecurity Essentials) and monitored network traffic to improve detection and response.

Courses & Internships

Ezz Al Dekheila Steel Co. (EZDK)

Information Technology Engineer

Alexandria, Egypt

Jul 2025

- Gained hands-on experience with Oracle Database and ERP systems, working with Oracle E-Business Suite to manage enterprise data and processes.
- Studied networking fundamentals and troubleshooting for core infrastructure concepts.
- Developed and optimized database scripts using SQL to streamline data operations.

Information Technology Institute

Linux Administration

Jul 2025

- Training on Admin I and Admin II: hands-on experience in user/group management, file permissions, and process control.
- Practiced storage configuration, network setup, shell scripting, and basic server administration.

Microsoft x Coursera

Microsoft Full Stack Developer Professional Certificate

Dec 2024

- Covered full-stack development, database management (SQL/NoSQL), and API design.
- Learned security best practices, scalability and performance optimization, and DevOps techniques for deployment and monitoring.

Google x Coursera

Google Cybersecurity Professional

Sep 2024

- Covered cybersecurity fundamentals: risks, threats, vulnerabilities, and mitigation techniques.
- Gained practical experience with SIEM tools and skills in Python, Linux, and SQL.

EC-Council	
SQL Injection Attacks	
Learned about SQL injection attacks — how malicious SQL can be injected into input fields to manipulate databases — and mitigation strategies to protect applications and data.	
MaharaTech	
Computer Network Fundamentals	
- Covered computer network fundamentals and key components. - Compared network topologies and categories, and reviewed OSI and TCP/IP models.	
NetRiders Academy	
CompTIA Security+	
- Studied attacks, threats and vulnerabilities, and architecture and design principles. - Covered operations, incident response, and governance, risk, and compliance topics.	
ISC2	
ISC2 — Online (Self-paced)	
- Focused on security operations, cyber threat intelligence, and risk assessment. - Studied network security, incident response, information security, and endpoint protection. - Handled multiple dynamic roles and included a dashboard for system control.	
Skillsoft	
CEH v12	
- Cybersecurity concepts, attack methodologies, and information warfare. - Implemented multiple roles (admin and user); admin can manage user roles. - Project features authentication, cinema/showtime selection, and seat selection.	
Cisco Networking Academy	
CCNA v7	
- Introduction to networks, routing & switching, enterprise networking, security, and automation. - Hands-on experience with Cisco routers and switches, network configuration, and troubleshooting. - Basic understanding of network protocols and services.	
Cisco, Microsoft	
Networking at ABC	
- CCNA and MCSA fundamentals. - Hands-on experience with routers, switches, and network configuration. - Basic understanding of network protocols and troubleshooting techniques.	

Skills

Programming	C/C++, JavaScript, Type-Script, Java, R, Python
Network Security	Familiarity with network protocols (TCP/IP, DNS, DHCP), firewalls (e.g., Cisco ASA, Juniper SRX), and network architecture.
Operating Systems	Windows, Linux, macOS — comfortable with command-line interfaces and shell scripting.
Web	ReactJs, Angular, SQL, HTML, CSS
Software Engineering	Software development, algorithm design, OOP, database systems, data structures, debugging, and Git.
Cyber Security	Kali Linux, cryptography, network security and firewalls. Tools: Nmap, Nessus, Burp Suite, Metasploit.
SIEM	Splunk, QRadar, log analysis ,threat intelligence.
Soft Skills	Communication, Analytical and Problem-Solving , Teamwork and Collaboration, Time Management and Organization, Continuous Learning .

Interests

Capture The Flag	Participating in CTF challenges demonstrates my problem-solving skills, ability to think outside the box, and passion for cybersecurity.
Linux	Since 2017, I have been in love with Linux. I recently switched to Mac OS, which feels like a premium of Linux.
Technical Writing	I write descriptive blogs about Linux — some are on my GitHub and on Medium.
Coding Challenges	Engaging in coding challenges, such as those on HackerRank, LeetCode, or Codewars, highlights my problem-solving skills, coding efficiency, and ability to work under pressure.

Languages

English	Professional proficiency(B+)
Arabic	Native proficiency
